

AgileBackup

Protect your business with efficient and reliable SaaS

As adoption of cloud computing across organizations of all sizes continues to grow, whether you're just starting out or well on your way to the cloud, it's likely that cloud-first mandates will be a priority for digital transformation initiatives. From moving production workloads to the cloud to leveraging an off-site cloud target for long-term retention or disaster preparedness, backup and recovery should be at the forefront of your cloud adoption strategy.

Easy-to-manage backup service

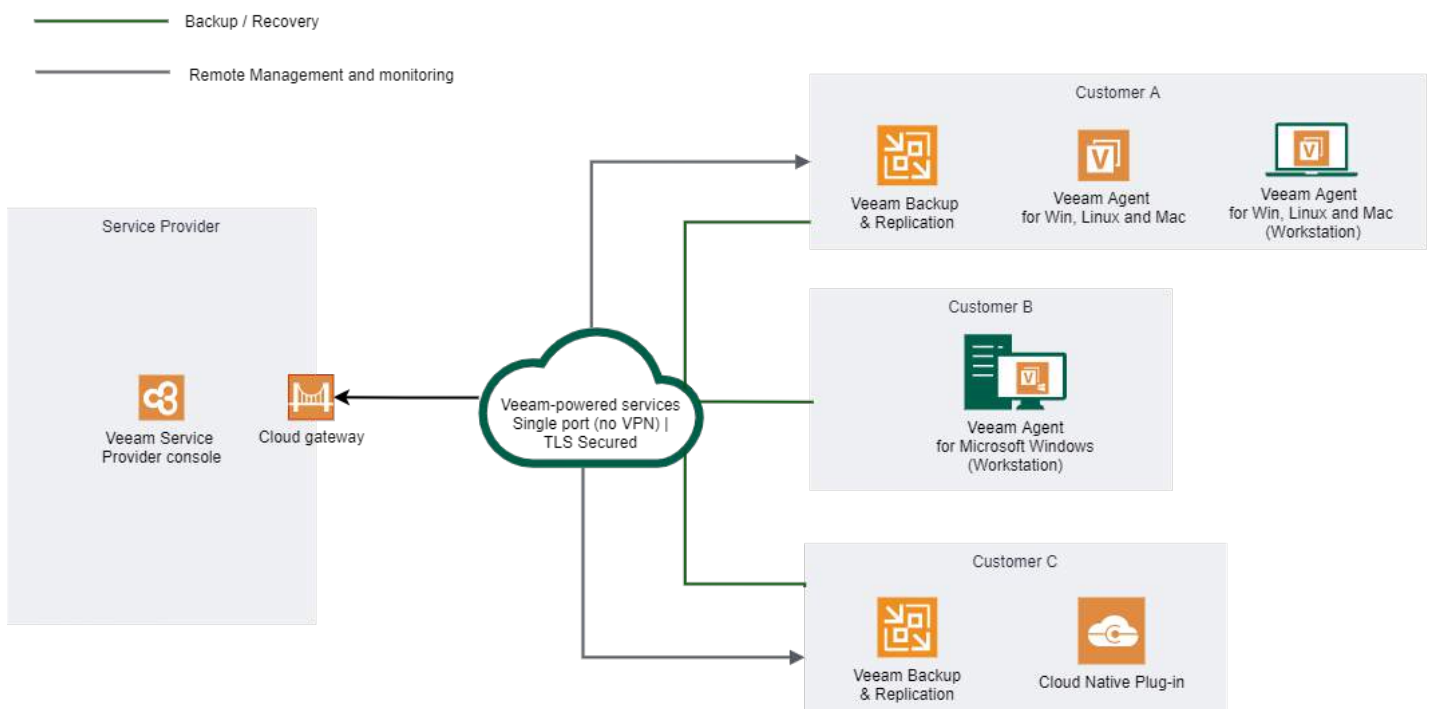

While organizations are now embracing the convenience of cloud computing, the ability to efficiently provision, manage and monitor cloud availability infra-structures can be an overwhelmingly complex undertaking requiring expertise and resources. You need a single, robust solution for comprehensive data management that is powerful and flexible enough to protect all phases of your evolving data life cycle, one that is secure enough to stand up against cyber-threats both now and into the future.

AgileBackup provides easy access to protect and manage backup data to the cloud, from the cloud and within the cloud. Getting started with AgileBackup is relatively simple. You can launch a backup service through single web-based user interface to remotely manage and monitor your backup services. Agile-Backup reduces administrative complexities and makes it easy to stay on top of everything with instant data availability.

Cloud capabilities for powerful, affordable protection

AgileBackup, powered by Veeam technology, is powerful, reliable and easy to use. AgileBackup reduces operational overhead and provides flexible options that fit your business. You can count on its market-leading reliability to kickstart and mature your cloud protection journey. AgileBackup delivers dependable availability across all cloud, virtual and physical workloads with a simple, flexible and reliable solution. Protect your data no matter the location or workload type with powerful backup and instant recovery options.

With AgileBackup, you can manage virtual, physical, and cloud-based Veeam availability solutions – including Veeam® Backup & Replication™ and Veeam® Agent for Microsoft Windows – without the need for direct connectivity.

Accelerate your global businesses expansion today!

Key Benefits

Simple Setup

Initiate a backup service from the management console, where you can deploy your own infrastructure or leverage the public cloud. New machines can be added for protection in just a few quick clicks.

Automated

Easily discover all the components of your business' Veeam environment using network-based IP range discovery, Active Directory or .csv file. Once discovered, managing Veeam Backup & Replication workloads as well as Veeam Agents is simple, allowing you to gain complete visibility and control over all the backup workloads you need to manage.

Remote monitoring and management

Access all the components of your entire Veeam environment with the power of AgileBackup console. The interface provides you with detailed job and health status as well as a quick summary. Remote management of backups and repli-cas could not be simpler, using a single, powerful web-based UI. AgileBackup leverages the power of Veeam cloud gateways, which enables data to be securely transferred over a SSL connection using a single port with no need for VPN or MPLS connectivity.

Security

Rest assured of protection for authorized IT staff through AgileBackup's secure multi-tenant portal. The secure portal displays protected machines and work-loads, backup jobs, status and repository consumption/quota.

AgileBackup Protects:

Cloud:
AWS, Microsoft Azure,
and Google Cloud Platform

Virtual:
VMWare vSphere, Microsoft
Hyper-V and Nutanix AHX

Physical:
Microsoft Windows, Linux,
Mac, IBM AIX, and Oracle
Solaris and file shares

Application:
Microsoft, Oracle, and SAP

About Us

Agilewing is a global AWS Consulting Partner and a company dedicated to innovative cloud technologies for our customers. In 2020, we were awarded the "AWS APN Consulting Partner of the Year" and "AWS APN Security Partner of the Year" in 2020. JAB Technologies, a sister company of Agilewing, is an information security expert committed to protecting customers' digital assets - from data access control, encryption, to data storage. As AWS's very first Managed Security Service Partner in Asia, our commitment is to delivery enterprises with services for cloud migration, DevOps, information security, compliance, training, and cloud operations. We also help partners build, market, and sell AWS offerings by structuring cloud computing partner ecosystem.
